Towers of Tomorrow with LEGO® Bricks exhibition at the Science Museum of Minnesota

March 16 – September 3, 2018

What: Towers of Tomorrow with LEGO® Bricks exhibition

Where: Science Museum of Minnesota
U.S. Bank Great Hall, level 4
120 W. Kellogg Blvd., downtown St. Paul

When: March 16 – September 3, 2018

Media Preview: Thursday, March 15, 11 a.m. – 1 p.m.
Please RSVP to Sarah Imholte (651-221-9412, simholte@smm.org).

Details: This spring and summer, Science Museum visitors of all ages will marvel at scale models of some of the world’s most famous skyscrapers, constructed entirely out of LEGO® Bricks by Ryan McNaught, one of only 14 certified LEGO® professionals in the world.

One of the signature elements of the Science Museum’s Year of the Engineer, the Towers of Tomorrow with LEGO® Bricks exhibition showcases the design and architectural accomplishments that are evident in Chicago’s Willis Tower; New York City’s Empire State Building and Chrysler Building; Shanghai Tower; Taipei 101; Melbourne’s Eureka Tower, and many more, as well as the creativity, inventiveness, and intricacy of the LEGO® creations themselves.

Towers of Tomorrow with LEGO® Bricks is a traveling exhibition from Sydney Living Museums and toured internationally by Flying Fish. It is presented locally by U.S. Bank.

Visitor Information: Admission to Towers of Tomorrow with LEGO® Bricks is included in exhibit gallery admission ($18.95 for adults and $12.95 for kids 4-12 and seniors). Combination exhibit gallery and Omnitheater admission is also available.

After its March 16 opening, Towers of Tomorrow with LEGO® Bricks will be open during regular Science Museum hours. It will run through Labor Day (Monday, September 3, 2018).
